TO SETUP EMAIL IN MICROSOFT OUTLOOK EXPRESS:

- In Microsoft Outlook Express, select Tools > Accounts.
- On the Internet Accounts window, click the Mail tab, and then click Add.
- On the Internet Connect Wizard, in the Display name field, type your full name and click Next.
- In the E-mail address field, type your email address and click Next.
- On the E-mail Server Names window, from the My incoming mail server is a list, select POP3.
- In the Incoming mail (POP3, IMAP or HTTP) server field, enter pop.secureserver.net.
- In the Outgoing mail (SMTP) server field, type smtpout.secureserver.net, and then click Next.
- In the Account name and Password fields, type your email address and password, and then click Next.
- Click Finish.
- On the Internet Accounts wizard, select the mail account you just created and click Properties.
- In the Properties window, click the Servers tab.
- Select My server requires authentication.
- Click the Advanced tab.
- In the Outgoing mail (SMTP) field, change the port number to 80, and then click OK.
